

Autoland Sciencetech * ISCANII Diagnostic Work Station

Supports more than 40 automotive manufacturers

External Modules for Test like ScopeMeter, Battery Test, Ignition Test....

Wireless Communication via built in Bluetooth technology....

Asian:

Acura, Daewoo, Daihatsu, Greatwall, Honda, Hyundai, Infiniti, Isuzu, Kia, Lexus, Mazda, Mitsubishi, Nissan, Perodua, Proton, Sangyong, Subaru, Suzuki, Toyota, OBDII

European:

Audi, BMW, Citroen, Fiat, Jaguar, Landrover, Mercedes-Benz, Mini-Cooper, Opel, Peaugeot, Porsche, Renault, Saab, Seat, Skoda, Smart, Vauxhall, Volkswagen, Volvo, OBDII

Domestic:

Ford, GM, Chrysler

**Built in J2534 (Passthru) device for BMW, Mercedes-Benz, Volvo.....
(for more details on coverage please call us)**

J2534 Pass-Thru Programming is a standard used to program automotive electronic control modules using the original vehicle manufacturers' software. The EPA mandates that all manufacturers' have to comply with standard for emission related control modules only, covering all models from 1997 till today. BMW allows the professional technician to not only program emission related control modules, but also program modules for all vehicle systems so the technician can have factory tool at a fraction of the cost.

**Built in IMS2 Interface Module Simulation System for BMW,(GT1, OPS)
Mercedes (DAS), Porsche (Piswis) Volvo (VidaDice)....
(For more details please call us)**
