

LAUNCH X-431

For European and Asian Cars

X431 auto scan tool is a new generation of product developed by Launch Tech.

It's a perfect marriage between automotive electronic technology and information networking.

X431 adopts open diagnostic technology, which is the most advanced in the world as well as the future of automotive diagnosis.

t carries PDA functions apart from reading trouble code, data stream and actuation test, sensor waveform and digital code control.

Features:

- * **Print out test data any time with built-in printer;**
- * **Easy operation through handwriting input on large touch screen;**
- * **As generic diagnostic equipment, it can interface with diagnostic adaptors of all vehicles models in the world;**
- * **Strong test capacity to cover all electronic systems;**
- * **Unique reading of data stream to ensure fast data updating;**
- * **Strong waveform display to monitor any change in the data stream;**
- * **Embedded operation system and open-platform diagnosis to make effective diagnosis possible;**
- * **Integrated adaptors featuring compact design and reliability;**
- * **Complete after-sales service system to give life-long service;**

Multi-language choices:

English, Greece, Russia, Poland, Turkish, Arabic Version

Optional Features:

**Interface with computer with X431-PCLINK,
Store test data in vehicle service record,
Simulate and test sensors with the help of sensor box,
Test the parameters of the battery and conduct analysis on battery conditions through battery box,**
